<b>Splendour In the Class</b>	<b>Micro Session Descriptions</b> Friday Night
---------------------------------------	---

### Micro-session 1

#### **Ipads and the Educreation App**

If there's one app that you must have installed on your iPads, it is 'Educreations'. Educreations is promoted as the app that turns your iPad into a recordable interactive whiteboard that captures your voice and handwriting to create amazing video lessons. **Laura Chaffey** will demonstrate how to use this app with K-6 students to not only create video lessons but also as an assessment tool to document and share student knowledge, skills and understanding. **Come along and get hands on for this session.**

### Micro-session 2

#### **NuLearn – Newcastle University Innovative Pedagogy Project**

Educational change is complex and takes place within an ecosystem of influences ranging from national policies and programs to local school specific contexts and cultures. **The NuLearn Group** will present the latest results from the Innovative Teaching and Learning project: an international research collaboration, sponsored by Microsoft, involving seven countries, Finland, Mexico, Indonesia, Russia, Senegal, UK and Australia. The research identifies the conditions that are most likely to promote innovation in teaching practices in schools. **A great session for school leadership teams and interested educators.**

### Micro-session 3

#### **Engaging your school community through Twitter and Facebook**

**This running sheet is offered as a guide to the night's events. Teachmeets are usually a little informal so we will not be hyper-vigilant on the night!**

How do you engage with your school community? In an age of social networking, has your school developed a positive online presence? **Chris Payne** will discuss and demonstrate the ways in which he uses social media to interact with the school community, enhancing communication, improving communications efficiency and promoting the amazing talents of student and staff. **Don't be the last school in HCC to go online!**

#### **Micro-session 4**

##### **Engaging young minds using Bee-Bot technology**

Bee-Bot is an exciting new robot designed for use by young children. This colorful, easy-to-operate, and friendly little robot is a perfect tool for teaching sequencing, estimation, problem-solving, and just having fun. **Janet and Sarah Howard** will demonstrate how these technologies are used in the classroom to inspire and engage young children. **A great session for Stage 2 and 3 educators.**

#### **Micro-Session 5**

##### **Edmodo – Safe secure social networking for learning**

Join the most world's most popular platform for socially networked learning. Used by more than 3 million teachers all over the world, Edmodo is a student's first choice for academic support and communications. **Brendt Evendon** will demonstrate the power of this platform and prove just how 'intuitive' it is. **Suitable for Stage 3,4,5 & 6 educators.**

#### **Micro-Session 6**

##### **Transforming Middle School Practice with Educ8**

Ken Robinson once wrote, "Education doesn't need to be reformed — it needs to be transformed." Two Waratah Technology Campus teachers are heading up an innovative program to shift the paradigm in Education. **Beau Berman and Cory MacDonald** will discuss their Middle School cross KLA team teaching program structured around the principles of collaborative PBL. Beau and Cory will outline their philosophy and approach and are keen to hear your thoughts and field your questions about educ8. **This session is a must for secondary educators looking for a way to engage and inspire Stage 4 and 5 students.**
